exon the impossible challenge

This has got to be by far one of the best routes for Train Simulator and certainly the only route worth \u00a324.99. The attention to detail on this route is stunning and with 200 miles of track it doesn't get boring. It comes with a nice variety of stock including the Class 25, Class 37, Class 101 and a Class 08, which is a generous amount of locomotives, but its a shame no steam engines are included. I would definatly recommend you get this route.. Tt is so difficult for me. Oh, these memories of the game on Nintendo :)

Guns'n'Stories: Bulletproof VR - game, the plot of which takes place in the Wild West.
Your granddad tells about his adventures, but the story gets confused and you have to fight back from the opponents. Opponents are not at all scary (from the word at all). The game is something like the Serious Sam - his variety of weapons and black humor. Impressions from the game unforgettable - who wants to remember the childhood, and even in VR - the game for you. Mar 13 2016) This game has plenty of room for improvements. Yes, It only has Bowling, but the plans look like they will be interesting and fun when they finish.

(Update: June 8, 2018) They added more stuff than I thought they would. So I guess things are going well? Hopeful on how long it will last.. Good :
- Nice concept and storyline (even it have some silly dialogue)
- Worth spending time

Bad:
- concept about 'spell' (I just don't understand why making some -sorry I've already forgot the word- ham for alligator have to be a spell?) .... just..

BTW ...I spent more than 10 minute for 'What ending is this!'.
So... if you are ok with the 'To be continued' ending, just buy it.. Rather clever Mahjong Solitaire with new gimmicks, power ups and a background story which can be skipped if chosen to. Tile sets are beautiful.. Beyond Distortions is extra content for anyone who appreciate the progress of Distortions game development.
It includes video documentary, concept art, fanart, completed in-game journal, and making of contents.
Very warm-hearted DLC for supporting indie studio. I'm struggling myself with question should I recomend this game or not. I'll give it a thumb up just because I got it on sale and it was worth $5. It's pure fun in any way, simple, beautiful, competitive, it kept me seated for 30+ hours. Yet, it feels like something's missing.

At first I notice release date for this game was 27. Jul 2017 and game is still in early access status. I'm not a game programmer, but I see no reason why this should not be full finished product by now. Though game is fun, it's limited to repetative battles in both single player and online mode. There are only three maps that differ only visualy and in size, game concept remains the same. At this time game should have offered many maps to choose from, many different battle theatres with unique airplanes. Also, developers should have included more than just "defend and destroy" bases concept. Instead of standard Blue and Red side (USAF vs. RUSSIA) there should be more options, we'd all want to see fractions consisting of european EF2000, Mirage, Rafale, Grippen..., US Navy's Tomcats, Hornets, Intruders..., maybe even some early Cold War era airplanes, aircraft carrier battles etc.

Player community is poor, there are rarely more than 2-3 live players in 4vs4 game, so basicaly most time you play against bots. I guess people soon get tired of flying same type of missions on three different yet similar maps.

For some reason I still enjoy playing this game, I guess mostly because I don't have time any more for lor long storyline games. The game is not bad, it's really fun, it's just that could offer much more. After few hours in the game it feels like I saw everything game has to offer.

Enjoyable but repetitive. I don't have a lot of playtime, but it is still a fun game from what I've seen. It reminds me of the older dungeon-crawler games. If you like games like Baldur's Gate, then you should buy this.. Made video for this game :)

https:\/\/www.youtube.com\/watch?v=-5md4Obr6uM. Tiara comes from the Compile Hearts game Fairy Fencer F, a game with the same character designer. This makes her the first character from another game to appear in the series. Tiara's Voice Actor is Kaori Ishihara. Strangely, she acts like Welsh Cocott (Mugen Souls) and Ram too. Tiara is the first and so far only character outside of the Neptunia series with a HDD form. After activating it, it is listed as Fury. Unlike others with an HDD form she does not change physically. She gains silver HDD accessory pieces with pink accenting.. Mister Kipper tells the truth.. fun at the first hours, bore to hell for there is lack of progressive but more and more nonsence everywhere. Fun, good gameplay, \u2665\u2665\u2665\u2665ing difficult. 10\/10 will break my keyboard again. Highly reccomend playing this with an NES controller because you can.. A really good set of cards to add a bit of colour (rather literally) to your game. A few cards are a bit hit or miss but given that the majority of the playerbase is going to be nerdy this deck works rather well.. Good paintjobs
